

Gas line permit

When a permit application is submitted for a gas line installation for a fire pit, fireplace, BBQ, etc., please provide the following:

1. 2 copies of the site plan showing the property lines, house, and any accessory structures or pools.
2. Gas and Electrical meters locations are to be identified on site plan.
3. The route of gas piping must be shown on site plan and notes indicating the type of piping
*material, the size of piping and the BTU demand for each appliance served.

***NOTICE:** High levels of acid (PH) found in many locations throughout the city from natural soils and imported soils have proven to have a highly corrosive effect on metallic piping installed underground. Brentwood prohibits the use of metallic gas piping underground without a soils analysis showing a level of (PH) that will not corrode metallic piping. (Brentwood Municipal Code 15.04.020)
